

wellbeing

Wellbeing is a Vet HQ wellness program initiative to help you to maintain optimal health for your pets. For a small fee we will keep a close eye on your pet's health. This Preventative Health program aims to stop disease occurring in the first place, not treat disease.

One Dog year is equivalent to 8 human years, and one cat year is about 7 human years. This figure equates to how rapidly their organs age. In other words a dog or cat's liver ages 7-8 times faster than a human year. We would see the doctor at least a couple of times in 8 years, but our pets are lucky to go once a year.

The wellness program will include:

- Quarterly Checks by a Veterinary Nurse (3 and 9 months post annual vaccination)
- Half yearly review with a Veterinarian (6 months post annual vaccination)
- An Annual Basic Health Profile and Blood Pressure Examination performed at the time of vaccination
- A nurse contact at Vet HQ to call at any time should you have any queries.

During these checks we will discuss anything and everything that is relevant. Phone calls will be made to remind you of these appointments.

We are looking forward to seeing you all soon at Vet HQ!

Geoff and the entire Vet HQ team.

OUR AIM:
Vet HQ
provides the
highest quality
pet care and is an
integral link in the
human animal bond.
Happy and healthy
pet's means not
only will they live
longer, they will
be happier.
